

KS3 Home Learning: Food and Nutrition

All food and nutrition home learning will be delivered through SMH (Show My Homework).

There will be a fortnightly piece of work set which will take at least 1 hour 40 minutes, to cover the length of your usual food lesson. The work will be a combination of food science theory, nutrition, food provenance, research, recipe planning, quizzes and practical work for students to attempt at home, where possible.

Students are able to contact us daily via email or to send us a message through Show my Homework.
